

RIT University in Dubai, a highly technologically-focused American university, is located in and sponsored by Dubai Silicon Oasis. Established in 2008, RIT University in Dubai is a not for profit university, accredited both in the United States and by the UAE Ministry of Higher Education. It is a branch university of RIT New York which offers internationally recognized American degrees in Business, Engineering, and Computing, both for Bachelor and Master programs. Students can also study at RIT's global campuses in New York, Croatia, and Kosovo, and are guaranteed to earn relevant work experience while studying through RIT's unique co-op program, which unlike any other university extends from 3 months up to a year. A graduate of RIT Dubai has the same benefits of RIT New York where the graduates' diploma is issued from the main campus at Rochester, New York.
