College of Medicine

College of Pharmacy & Health Sciences

College of Architecture, Art & Design

College of Business Administration

College of Dentistry

College of Engineering and Information Technology

Established in 1988, Ajman University (AU) was the first private university in the GCC – and the first university in the UAE to admit expatriate students. Since then, AU has made a difference, locally and globally, as a pioneer for inclusion, innovation, and social impact.

Each of AU's 24 undergraduate and 12 graduate programs offer academic rigor as well as hands-on experience. Our 9 colleges are focused on putting imaginations into action for the greater good. Our diverse faculty are experts in their fields, with ever-increasing research capacity.

In addition to conferring valuable degrees that lead to meaningful careers, we believe our role is to foster every student's innate sense of curiosity and to inspire lifelong learning. Our global network of +37,000 alumni is inventing the future right now.

Social responsibility has been part of the collective DNA at AU since the beginning. The majority of our students participate in impactful service-learning programs in Ajman, the UAE, and beyond.

What sets AU apart from other institutions is this unique culture of innovation and compassion. We want to make a difference with our hearts as well as our minds. Our motto is "Make it Happen" and we deliver on that message every day!
